

# 2016 Construction Project

## Maple Street Bridge, Farmingdale

### Project Highlights

- Replacement of bridge superstructure
- Raising height of bridge to provide 15'6" clearance
- Bridge to be closed during construction
- Construction from May 2016 to November 2016
- \$1.4 million project

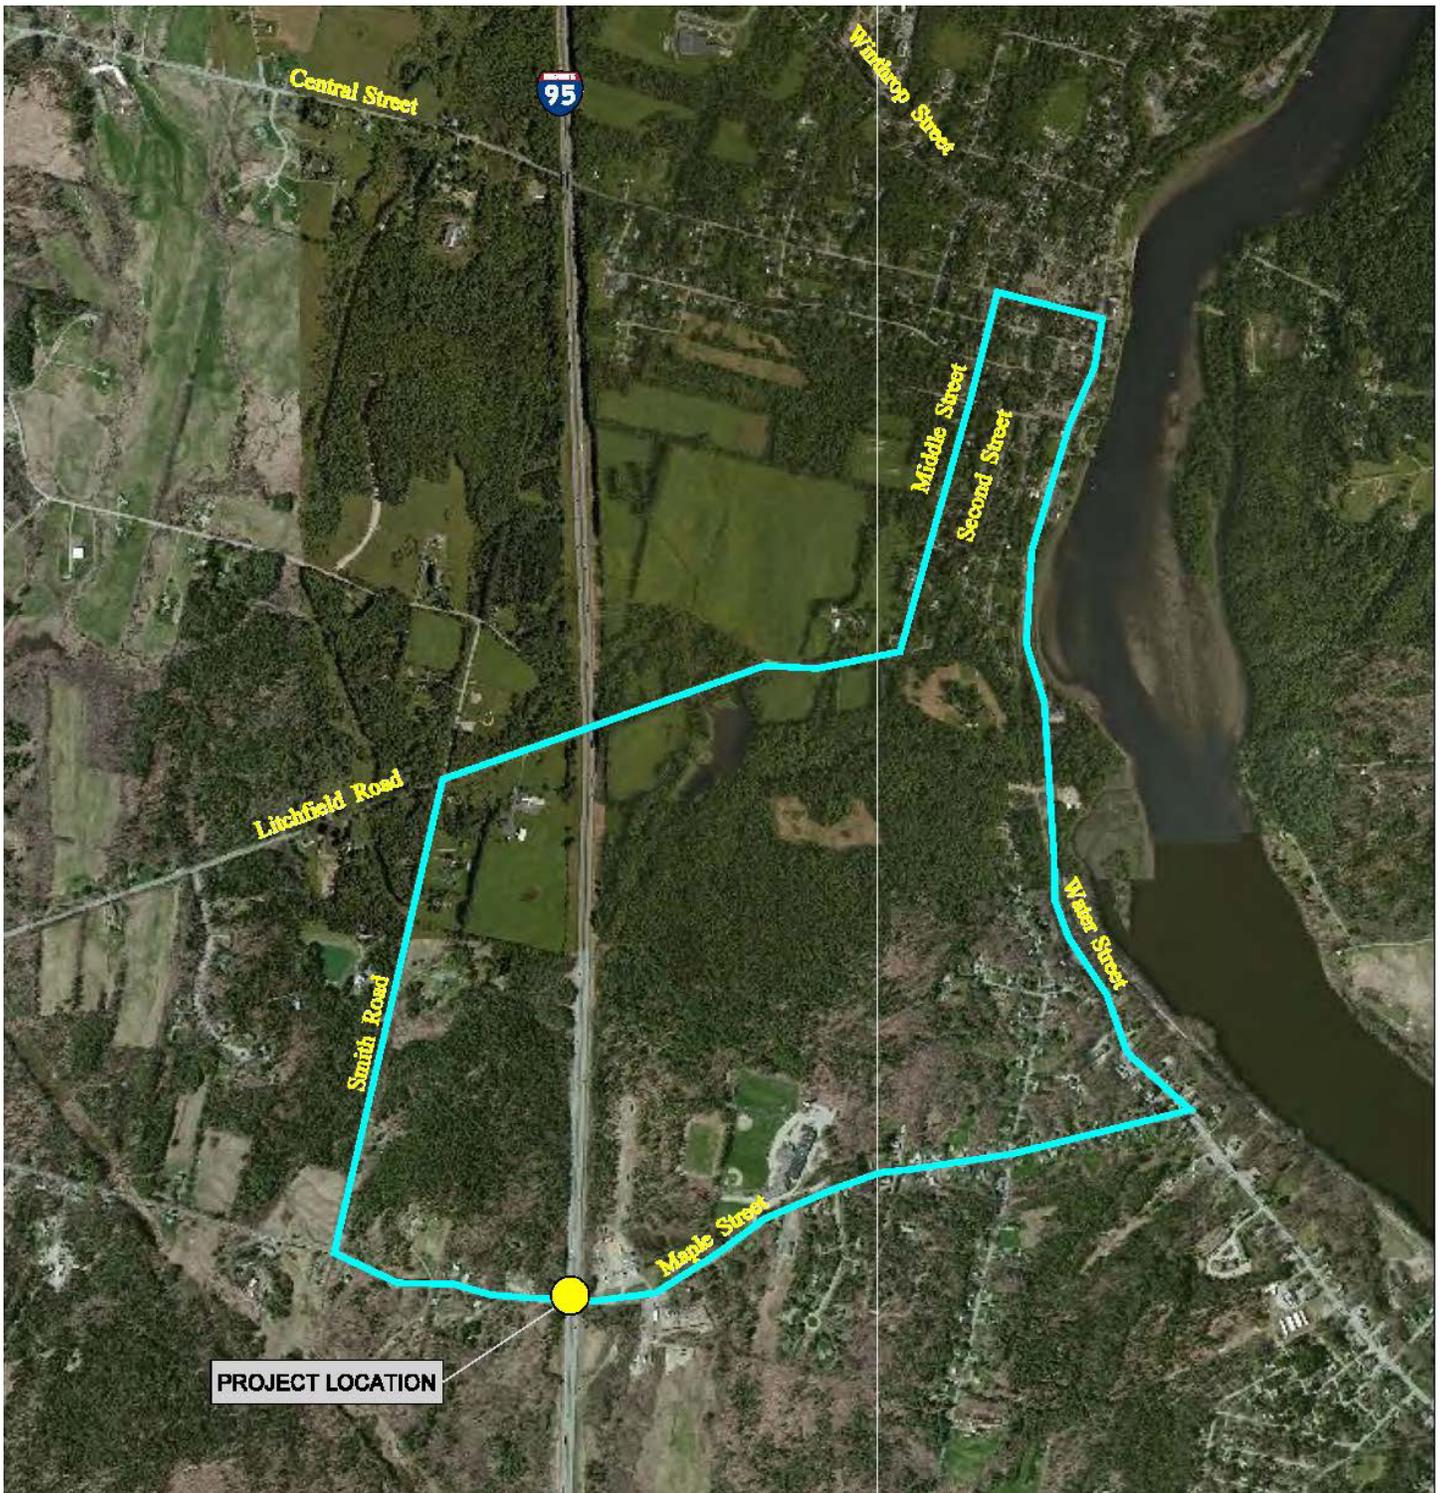

This project consists of replacing the Maple Street bridge superstructure over the Maine Turnpike at Mile 106 in the Town of Farmingdale. The rehabilitation of the bridge includes replacement and raising of the existing bridge structure to provide a minimum vertical clearance of 15'6", and repair of the existing abutments and piers. It also includes reconstruction of approximately 600 feet of the bridge approaches to match the raised bridge structure. The bridge will be closed to traffic for approximately 6 months during the construction of the improvements.

# Maple Street Bridge Detour Route

The Maple Street Bridge carries approximately 1190 vehicles per day over the mainline of the Maine Turnpike. Traffic will be routed around the site via a detour using Smith Road, Litchfield Road, Middle Street, Central Street and Water Street. The detour as signed is approximately 4.9 miles long.
